

# Algebra I – Unit 7: Radical Expressions

## Phoenixville Area School District

Stage 1 Desired Results					
<p><b>PA Core Standards:</b>            CC.2.1.8.E.4 Estimate irrational numbers by comparing them to rational numbers.</p> <p>CC.2.1.HS.F.1 Apply and extend the properties of exponents to solve problems with rational exponents.</p> <p>CC.2.1.HS.F.2 Apply properties of rational and irrational numbers to solve real-world or mathematical problems.</p> <p>CC.2.2.8.B.1 Apply concepts of radicals and integer exponents to generate equivalent expressions.</p> <p><b>Keystone Assessment Anchors:</b>            A1.1.1.1 Represent and/or use numbers in equivalent forms (e.g.,</p>	<b>Transfer</b>				
	<p><b>TRANSFER GOALS</b>  <i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li>• <i>Number Sense:</i> Develop a sound foundation to demonstrate the value of numbers by describing their various representations, relationships, and patterns.</li> <li>• <i>Fluency:</i> Demonstrate automatic recall of addition, subtraction, multiplication, and division of rational numbers.</li> <li>• <i>Reasoning:</i> Demonstrate mathematical resilience and conceptual understanding through the use of vocabulary, written expression, graphical representation, and alternate strategies.</li> </ul>				
	<b>Meaning</b>				
	<table border="1"> <thead> <tr> <th style="text-align: center;">UNDERSTANDINGS</th> <th style="text-align: center;">ESSENTIAL QUESTIONS</th> </tr> </thead> <tbody> <tr> <td> <p><i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li>• Mathematicians flexibly use symbols, numbers, words, and visual representations while maintaining the integrity of the relationship between quantities.</li> <li>• Algebraic rules and properties determine how expressions are simplified and how equations are solved.</li> <li>• Mathematicians think about reasonableness throughout the problem-solving process.</li> </ul> </td> <td> <p><i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li>• What does this quantity/number/expression/value mean? What are the ways to represent it? Is there a best way?</li> <li>• How do figures/quantities/numbers/operations relate to one another?</li> <li>• Have I represented the relationships between the quantities appropriately?</li> </ul> </td> </tr> </tbody> </table>	UNDERSTANDINGS	ESSENTIAL QUESTIONS	<p><i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li>• Mathematicians flexibly use symbols, numbers, words, and visual representations while maintaining the integrity of the relationship between quantities.</li> <li>• Algebraic rules and properties determine how expressions are simplified and how equations are solved.</li> <li>• Mathematicians think about reasonableness throughout the problem-solving process.</li> </ul>	<p><i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li>• What does this quantity/number/expression/value mean?
